

Group number: 2

Team members: Sydney Schrader, Ashley Settle, Victoria Plaxton

Name of project: ShowMate

Dependencies: Xcode 16.1

Feature Description	Description	Release planned	Release actual	Deviations (if any)	Who/Percentage worked on
Login/Creating a Profile	User can log into their account or create an account	Alpha	Alpha		Nick 50% Ashley 50%
Change username	User can change their username on the settings page	Alpha	Alpha		Ashley 100%
Currently Watching list	User can keep track of shows they are currently watching	Alpha	Alpha	Was planning on having a plus sign on the list to add but didn't seem intuitive	Sydney 75% Victoria 25%
API, scraped information on TMDB	Information about shows, including what platforms to watch that show on, a description, and a link to a poster image	Alpha	Alpha		Victoria 100%
Want to watch list	User can keep track of shows they want to watch	Alpha	Beta		Sydney 100%
Searching for	User can	Beta	Beta		Victoria 100%

TV Shows	search all of TMDb for shows based on a keyword				
Show Detail Page	User can read about the shows they search for or that are on their watchlist. Information from API	Beta	Beta		Victoria 50% Sydney 50%
Follow Friends	Users can follow and see updates from friends that also have accounts.	Beta	Beta	Was going to have mutual adding friend feature but changed to just following people	Ashley 50% Nick 50%
Privacy	User can set their account to private so that they are not visible when other users search for them	Beta	Beta	Was going to have a request feature but changed to just not being visible when searched	Ashley 50% Nick 25% Sydney 25%
Status Updates, likes, comments	Users can choose to make status updates about the show they are watching public and include messages about them. Other users can like an	Beta	Final		Sydney 80% Victoria 20%

	comment on these status updates				
Profile Page/view profile button in settings	When searching for friends or looking at current friends, user can click on their profiles and see what they are currently watching, and recent status updates	Not planned	Final	We never described this in our proposal but it seemed intuitive to have a page where you could see friend's information , and your own	Ashley 75% Sydney 25%
Shows i've seen list	User can keep track of shows they have already seen	Alpha	Final	Ratings were going to be apart of this but didn't make it	Sydney 100%

Other Deviations:

Groups, chat, and polls felt unnecessary/not intuitive for our app in the timeline we ended up having. While these features could be cool in the future, we felt as though we wanted to focus more on making other features better.
